Art Unit: 3729

Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is far from clear why Applicants recite *inter alia* ... a first plurality of connector slices.

When Applicants do not recite ...a second plurality of connector slices or the like.

Moreover it is not clear or certain what Applicants intend by the language ...connector slices in vertical alignment ... (in Claim 1) For example What is the "first plurality of connector slices" aligned with?

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 2, 5-12, 18 and 20 are further rejected under 35 U.S.C. 103(a) as being unpatentable over Grabbe et al.

Grabbe et al teach electrical connection for shielded coaxial conductors. An housing assembly comprising a first plurality of connector slices (at 62 and 82' (in Fig 10)), stacking the connector slices in vertical alignment with other connector slices such that the stack has a predetermined height wherein each of the through-holes (e.g. near 2 and 2') is adapted to receive a conductor.

Claims 3, 4, 13-17 and 19 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
